ABOUT ME

To secure an entry-level software development position in a dynamic IT company where I can apply my programming skills and technical knowledge to contribute to innovative projects. I aim to enhance my practical experience while strengthening my understanding of software design, development, and emerging technologies. I am eager to work in a collaborative environment that encourages continuous learning, creativity, and professional growth.

PROJECTS

Fake News Detection System

Developed a machine learning-based web application to classify news articles as fake or genuine using Natural Language Processing (NLP) and TF-IDF feature extraction. Built a Flask-based application with a responsive interface, user authentication, and SQLite database integration. Evaluated and optimized multiple machine learning models using accuracy, precision, recall, and F1-score to improve prediction performance.

INTERNSHIP

Livewire - Hopes, Coimbatore

2025

During my internship at Livewire Hopes, Coimbatore, I worked on software development projects involving both frontend and backend technologies. My role focused on developing user-friendly interfaces, integrating backend functionalities, and ensuring seamless application performance. I actively improved my skills in debugging, testing, and writing clean, efficient code, while gaining practical exposure to the complete software development lifecycle. This experience enhanced my problem-solving abilities and strengthened my understanding of real-world software development practices.

EDUCATION

Master of Computer Applications (MCA)

2025- Now

-KGISL Institute of Information Management - web development and cyber security

Bachelor of Computer Applications (BCA)

2022 - 2025

- KG College of Arts and Science, - Relevant courses: Data Structures, Algorithms, Computer Networks, Database

Higher Secondary Education

2021 - 2022

- Chandra Matriculation Higher Secondary School

SKILL

Languages: Python, JavaScript, Visual Basic

Web: HTML, CSS, Bootstrap

Database: SQL, MongoDB

Tools: GitHub, Linux Shell, UiPath, Canva

Testing: Manual Testing (SDLC/STLC)

ACHIEVEMENTS

PARTICIPATED IN UiPath HACKATHON

Developed WhatsApp message automation using UiPath activities to streamline communication with multiple contacts.

PARTICIPATED IN SMART INDIA HACKATHON

As a team, we developed a prototype for disaster management using AI-powered UAV drones.

CERTIFICATES

IBM: Enterprise Design Thinking Practitioner, Getting Started with Artificial Intelligence, Build Your First Chatbot

ServiceNow: Micro-Certification - Welcome to ServiceNow, Automated Test Framework, Flow Designer, UI Builder Micro-Certification

MindLuster: Linux Shell Scripting Automating Command, UI Path, Full Stack AWS Application

GUVI: Python

MongoDB: Introduction to MongoDB

Coursera: Cloud Programming with Python
